

# FELLOWSHIP TESTIMONIAL

## **Dr. Joseph Maalouly MD**

I had the pleasure to work with dr.Choi over 8 months, it was a great opportunity where I learned a lot about spine surgery. My knowledge was vastly expanded during that time, I got to experience robot assisted spine surgery, biportal endoscopic spine surgery, cervical and lumbar spine disc replacements, lateral ALIFs, anterior to psoas lumbar spine fusions and spine deformity correction. Also, I have been invited to multiple cadaveric labs to enhance these skills. We have published multiple papers during that time as well.

Furthermore, I enjoyed my time with Dr Choi and had some very memorable occasions, he is a wonderful and compassionate person. He has taught me the key to a good work life balance with his motto "work hard play hard".
