

FELLOWSHIP TESTIMONIAL

Dr. Juan Amaya

My fellowship experience with Dr. Choi has been amazing. Since day one he has made me feel welcome in his practice.

This fellowship is remarkable because it exposes you not only to almost all fields of spine surgery but also to cutting-edge surgery. You will be exposed to a vast number of lateral surgery (ATP), robotics surgery and endoscopic surgery in a way I haven't seen before (UBE).

Also, you will get familiar with motion preservation devices in both the cervical and lumbar spine.

In addition, teaching is present every day, whether it's at the clinic or in surgery, Dr. Choi will always make time for teaching which is highly valuable in a training period.

Last but not least, Dr. Choi will make you feel at home all the time, he will show you around Melbourne!

I will be forever grateful for letting me have this amazing experience.
